J. NELSON HAPPY
CHIEF EXECUTIVE OFFICER

July 3, 2001

Mr. Kevin Kennedy
Project Manager
California Energy Commission
1516 Ninth Street – MS 3000
Sacramento, CA 95814

Dear Mr. Kennedy:

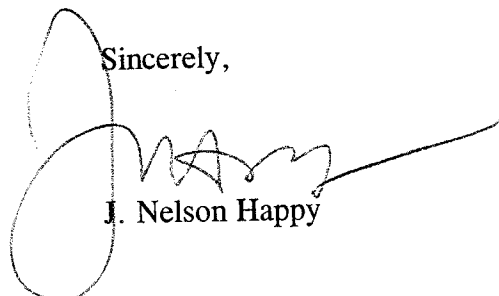

Pursuant to the provisions of the California Emergency Power Plant 21-Day Permit Process, CENCO Electric Company hereby submits this revised application with amendments/clarifications incorporated to our June 22, 2001 Application for Certification seeking authority to construct and operate a new 51.48 megawatt peaking power plant located on CENCO property in the City of Santa Fe Springs, Los Angeles County, California. The power plant will be a simple-cycle peaking electric generation facility consisting of one FT8 Pratt & Whitney Twinpac gas turbine engine.

Additionally, as discussed by our staffs, CENCO certified an Environmental Impact Report (EIR) for its Refinery Upgrade Project in 2000. As requested, we previously submitted 5 "hard" copies of the EIR for your distribution. The executive summary of the EIR is attached to the Application for Certification as Attachment H.

As an officer of CENCO Electric Company, I hereby attest under penalty of perjury that the contents of this application are true and accurate to the best of my knowledge.

Dated this 3rd day of July 2001.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Nelson Happy', with a large, stylized initial 'J'.

J. Nelson Happy
